Our Credentials

At ALS, sustainability is at the heart of what we do. It's not just about saying we care about our sustainable efforts, it's about showing it is in our day-to-day practice. We make change where it matters most and create partnerships that support this.

How We Achieved Carbon Neutrality

✓ 131 tonnes CO²e saved

Equivalent to 28 cars off the road for a year

✓ Natural Gas ↓ 7%

✓ Grid Electricity ↓ 10%

✓ Diesel ↓ 16%

✓ 1,800 tonnes CO²e offset

Through verified international projects

We Became Carbon Neutral 15 Years Ahead of Plan

When we set out to achieve Net Zero by 2040, we knew it would be challenging. What we didn't anticipate was that our team would push us across that finish line in 2025 – fifteen years ahead of schedule – and in doing so, become the first commercial laundry operation in the United Kingdom to achieve independently verified carbon neutrality certification under ISO 14068-1 and ISO 14064-1 standards.

Our journey wasn't purchasing carbon credits to greenwash our operations. It was our team that fundamentally transformed how we do business, that refused to accept "industry standard" as good enough, and that proved an SME in one of the most energy-intensive sectors can lead on climate action.

**ISO 14064-1
&
ISO 14068-1
certified.**

What We Changed

This didn't happen by chance. We achieved this by sustainable operational changes that compound over time.

We reduced our electricity by 10% through LED lighting, heat recovery, and process optimisation. Reduced our natural gas by 7% via improved heating efficiency and ozone technology for lower-temperature washing. Our Diesel consumption decreased by 16% through smart route optimisation and fleet monitoring. Additionally, we partnered with Carbon Neutral Britain and support Project 1024 – Hydroelectric Power in Viti Levu, and Project 1056 – Chacayes Hydro Project.

Trusted Carbon Neutral Laundry Partner for Scotland's FM Sector

Facilities management operators need supply chain partners who strengthen – not complicate – their own service delivery and tender credentials. ALS brings certified carbon neutral laundry, ISO 9001 quality management, and multi-site Scottish coverage to FM contracts of every scale, from single-site mobilisations to national framework agreements.

Multi-Site Coverage Across Scotland's Key Regions

ISO 9001 Quality Management & Audit-Ready Service Records

EcoVadis Verified Supply Chain Sustainability Credentials

Carbon Neutral Certified Strengthen Your Own Tender Bids

Why FM Operators Choose ALS

When you're managing laundry as part of a wider FM service, you need a specialist provider whose credentials stand up to client scrutiny. ALS is the only commercial laundry in Scotland – and the first in the UK – to hold ISO 14068-1 carbon neutral certification, giving your FM proposition a verified sustainability advantage

Key Benefits

ISO 9001 quality management and full service documentation, keeping your contracts audit-ready and your clients assured

EcoVadis rating and ISO 14064-1 carbon footprint verification, directly transferable to your own supply chain sustainability submissions and procurement bids

Dedicated account management across four Scottish sites, providing the service reliability and flexibility FM mobilisations demand

***Certified. Reliable.
Competitively
Differentiated.***
